

## Vice President Clinical Development

**Location: Switzerland, Europe, or U.S.**

### The Role

As a key member of the Management Team, the VP of Clinical Development will develop and lead ImmunOs Therapeutics' clinical strategy and medical activities including working closely with the CMO to support project management, prioritization, and engagement with external partners and advisors.

The Vice President of Clinical Development will take charge of building the appropriate (virtual or in-house) capabilities to progress the lead program through clinic.

Reporting to the CMO the Vice President of Clinical Development will bring strong scientific expertise within oncology and, if possible, immuno-oncology discovery and development area. In particular, the successful candidate will be experienced in the operational, regulatory, and due diligence aspects of relevant clinical operations and communications for in-licensing of early-stage assets.

### Responsibilities Include:

- Lead the clinical operations of ImmunOs Therapeutics' lead program iosH2 in Australia (Phase 1) and U.S. (Phase 2).
- Contribute to strategy development and decision making in relation to company-wide clinical issues as a member of the leadership team.
- Serve as a content expert on clinical operations and relevant disease area domains with a focus on driving assets from regulatory approval through multiple phases in clinic.
- Align, structure, motivate and lead the clinical development organization through engagement with our external clinical consultant and CRO to support iosH2 milestone achievement and adherence to internal/external metrics i.e. budget, timing, and strategy.
- Direct the implementation of clinical processes, with support of our external consultant and CRO, including implementation of IT systems to support documentation (data, protocols, reports, patent applications).
- Support the CMO to represent the overall clinical perspective, where needed, in investor presentations, board meetings and with business and financial partners.
- Recruit, develop and retain talent in the oncology clinical organization by providing professional and personal growth opportunities and mentorship. This may include building and managing people in the future.
- Participate in regulatory interactions, providing medical input into discussions with regulatory agencies.

## The Person

The successful candidate will:

- Have a track record for clinical Phase 1 and beyond for the development of innovative products to support existing product development and future opportunities evaluation.
- Have experience in pharmaceutical R&D with strong leadership skills and the ability to collaborate with internal and external thought leaders.
- Be able to critically evaluate scientific data and clinical data to communicate to both scientific and non-scientific communities.
- Be able to communicate with high impact internally and externally and have the ability to translate science into commercial value and to challenge business cases.
- Have the ability to build trust-based relationships internally and externally.
- Have previous experience within oncology and ideally immuno-oncology.
- Take a leading role in supporting the CMO on the composition, relationship development, and contribution from ImmunOs Therapeutics' Clinical Advisory Board.
- Work with the rest of the executive management team in preparing presentations to the Board of Directors, Advisory Committee and lead the implementation of collective decisions.
- Have a PhD, MD or equivalent scientific qualification.
